U.F.A. Convention to Be Held at Vulcan on Sat., June 24th

On Saturday, June 24th a convention of the Little Bow U.F.A. Constituency will be held at Vulcan in the Odd-fellows' Hall. Two sessions are being held, afternoon and evening, at 1:30 and 8:00 o'clock. The former will be addressed by Hon. O. L. McPherson, Minister of Public Works, and the latter by Norman F. Priestly, vice-president of the U.F.A.

Business of the sessions will include regular routine work, consideration of reports, resolutions and election of officers. Every local in the constituency is expected to have one or more delegate present in accordance with the representation basis.

Arrowwood Defeats Queenstown

In a baseball fixture on the local diamond Wednesday evening the fast Arrowwood aggregate took the Queenstown Nine into camp by a score of 16-6. The game which was featured by heavy hitting, was very rugged at times, both teams making serious errors. M. Norton received a rather serious injury in the sixth inning and was replaced by Archambault.

The battery for the visitors was H. Rubbelke, J. Rubbelke and B. Soli. For Arrowwood, Norton, Archambault and Bowman.

Umpire—Beagle.
Time of game—1-50.

Summer Fallow plowing done by the acre or on contract. Apply Resource Office.

Brethren Church Bible Class Met at Home of Mr. and Mrs. Norton

A very pleasant Sunday was spent at the home of Mr. and Mrs. M. C. Norton by the members of the Brethren Bible Class and some of their friends. A sumptuous repast was served in buffet style. The afternoon was taken up in discussing matters for the betterment of church and community affairs and visiting, after which cake and ice cream was served. Those present were: J. H. Brubaker, Mr. and Mrs. J. S. Culp and granddaughter, Donna Jean, Mr. and Mrs. S. M. Burger, Mr. and Mrs. J. A. Mason, Mr. and Mrs. P. Norton, Mr. and Mrs. E. C. Bowman and son Gyleen, Mr. and Mrs. A. J. Kaufman, Mr. and Mrs. Lawrence Larson and Arla Jean, Mr. and Mrs. L. H. Irwin, Mr. and Mrs. Paul Irwin, Mrs. Nellie Lehman, Mr. A. Salter, Mrs. Wright, Mr. and Mrs. W. G. Burris and son Ronald and Mr. and Mrs. V. E. Vance.

Representatives to Jr. U.F.A. Conference Return Home

Elma Connel, Louise Rubbelke, Margaret Wilson, Pearl Soli, Jesse Ladd, Norman White, Ford Mallett, Robert House and K. L. Campbell, were those from Arrowwood and Queenstown who attended the Junior Conference in Edmonton from June 7th to 13th inclusive.

The young people of Bow River carried away more than their share of honors, in public speaking, gown judging and sport contests. They are proving to the Senior organization that the effort spent on the young people is truly worthwhile. Among those receiving honors were:

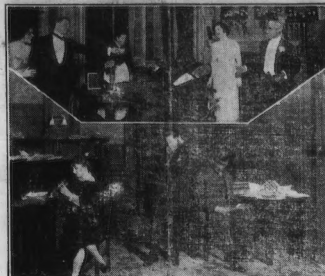

Jack Bushel, first place in grain judging; Nora Wainwright came second in sports; Dorothy Bushel won the scholarship to Olds School of Agriculture, and Robert House, Jr. Director.

British American Oil Co. to Erect Warehouse

The British American Oil Co. Limited have secured the site just opposite the Revelstoke Sawmill Co's office and their agents here, Larsen Implements have been chosen to be graded this cause location and will immediately proceed to erect a warehouse, for which the contract has already been let to this local firm.

Born—At Mrs. Lewendon's Nursing Home, on Sunday, June 18th, to Mr. and Mrs. H. Mulberry, a son.

"A Pair of Sixes"—Brilliant Farce- Comedy at Chautauqua

This popular production will be presented by a splendid dramatic cast on the fourth evening of Chautauqua. It concerns two business associates whose manufacturing company has prospered but at the same time brought misunderstanding and conflicts between them. After a series of events one agreed to become the other's butler for a year in an effort to settle their difficulties. The subsequent adventures that develop and impossible situations that arise provide an hilariously mirth-provoking evening. Here is a comedy that entertains and at the same time stimulates feeling and thought. You will not want to miss it.

Fourth Evening of Gleichen Chautauqua, June 30 to July 4th.

Buffalo Hill News

Mr. and Mrs. W. F. Jannetohn returned from Sylvan Lake on Monday, June 19th and state that the weather condition there is much the same as here, with some local showers.

The crops on summerfallow are doing very well so far, but those on spring plowing are needing rain. There are a few grasshoppers, but not enough to do any serious damage as yet.

Pat Robinson, brother of Clarence Robinson of the Service Station on High River Highway, had the misfortune to have his shoulder dislocated while playing football at Kircaldy last Monday and had to be taken to the Vulcan Hospital for medical attention.

Saturday being the twelfth birthday anniversary of her daughter, Agnes, Mrs. F. J. McInelly entertained in honor thereof, a few of her little play mates. The time passed all too quickly in the playing of various games and contests and after all had done ample justice to a delicious lunch, the guests all wended their way homeward, wishing Miss Agnes many happy birthdays. Those present were: Doris and Jean McInelly, Elaine Swanson, Marion Baker, Elsie and Agnes McInelly, Gordon and Donald Richards, Jack McInelly, and Howard and Norman Baker.

U.F.W.A. Dance Was Well Attended

The dance sponsored the U.F.W.A. last Friday night at the Canada Land & Irrigation Co's barn, proved to be a very enjoyable event. A large crowd was in attendance and the music supplied by the orchestra kept the crowd in a lively mood throughout the evening.

The Arrowwood baseball team will journey to London on Friday to try conclusions with the London Nine.

Milo Notes

The Young People's Society of Milo United Church held their first social evening last Saturday with a good crowd in attendance. Mr. Abbel, Principal of Queenstown School gave several readings which were much appreciated. Ruth Northcott and Doris Bechner sang a duet, entitled "I Love You Truly". Marion Coleman gave two readings "Foreign Views of a Statue", and a selection by "Courier". The girls then served a lovely lunch of ice cream and cake. The evening was brought to a close by singing community songs.

Bill Holten's new addition to his house, is nearly completed and Lawrence Phillips' house is coming along like wild fire. Here's hoping it will be finished in time for a chiv—Our main Street is surely looking prosperous.

Mr. and Mrs. McLean made a business trip to Vulcan on Monday.

The government must be doing a rushing business in stamps according to the number. (Continued on page 4)

H. J. Humphrey, newly appointed general manager of the Canadian Pacific Railway, with headquarters in Montreal, succeeding J. J. Scully, who relinquished his post on account of ill health after many years service. Mr. Humphrey was formerly assistant to Mr. Grant Hall, Vice-President.

Arrowwood Notes

Mr. and Mrs. S. M. Burger were visitors to Calgary last Monday.

Chautauqua will open their four-day program at Gleichen on June 30 - July 1-4.

J. H. Brubaker and J. S. Culp are spending the week-end at Vidora, Sask.

Mr. and Mrs. Paul Irwin of Irican, spent last Sunday in Arrowwood.

The days are growing shorter and now we won't have so much time to worry.

Mr. and Mrs. G. F. Kemper and Betty Ann were visitors to Calgary last Thursday.

Mr. and Mrs. Elmer Lyle of Calgary were week-end visitors at the home of Mr. and Mrs. W. C. Lyhe.

Mrs. M. H. Ward and Mrs. R. R. McBride were visitors at Baintown on Thursday, when a U.F.W.A. Local was organized, at the home of Mrs. W. Lyons.

Returning from Sylvan Lake Monday night, Joe Burger will take over the Arrowwood Pool elevators while F. C. Miller, the local agent is away on holidays.

Members and friends of the Brethren Church are building a garage and preparing the Brethren parsonage for the use of Rev. J. Wiend, who will arrive here about July 29th.

The "Sign of the Cross" presented at the Arrowwood theatre Friday night drew a record crowd and Mr. Ubertino played the picture again Monday night, for those who were unable to gain admission Friday.

Mr. and Mrs. R. F. Williams returned last Wednesday from their motor trip to Cove. Ore. They were accompanied home by Mr. and Mrs. Williams, Sr. who will spend some time in the district, visiting with their four sons.

Clarence Brubaker and Grace Brubaker, son and daughter of J. H. Brubaker, arrived by car from California last week and will spend the summer in the Arrowwood district. The former has been engaged in teaching at Ojai, while Miss Grace was employed in Pomona, of the Golden State.

The choir of the United Church are preparing special music for next Sunday morning, the last Sunday before the holidays. They expect to get together again next September but this will be their last Sunday for the present.

A very serious accident occurred last week, when a workman engaged at the farm of Mr. Belger was badly burned when gasoline exploded, while he was working on a carburetor of a car. He was rushed to Arrowwood, where he was attended by Dr. E. J. Liesemer.

At a meeting of the School Board held last the application of Miss Andrews and Mr. R. Sharpe were accepted. Miss

The Douglas System of Economics

An evening of real enjoyment is offered those, who today think there is at least some fault with our present Economic structure.

Wm. Aberhart B. A. has a live solution in the Douglas System. He is a man who carries his subject to the people in a convincing manner. It is not his wish to be mixed up in Politics of any kind, but he feels he is doing humanity a great service, by carrying this message to them.

He has given this subject much study, so is in a position to answer any questions that may be asked, either by would be converts, or opponents of this system.

Anyone attending the meeting to be held in the Church of the Brethren on June 28th at Thursday at 8 p.m. can be enlightened on anything that in their minds, there is the least doubt, by asking a question, and that they are assured that they will be answered in all courtesy by Mr. Aberhart. He is anxious that you should thoroughly understand what he proposes before accepting it.

Owing to space, Children under 16 years of age will not be admitted unless accompanied by their parents. A silver collection will be taken to defray expenses.

Program of Service at United Church Sunday

The Lord is in His Holy Temple.
Anthem—The Master of the Garden.
Prayer.
Hymn.
Solo—Wm. I. Mackie.
Scripture Reading—Psalm 23.
Anthem—Kneeling at the Threshold.
Announcements and Offertory.
Hymn.
Sermon.
Solo—Mr. Westwood.
Hymn.
Benediction.

Andrews, who has been in charge of the primary room at Leonard will fill the same position here, and Mr. Sharpe will take charge of Grades 6, 7, and 8. The appointment of a principal was left over until next week.

A number of friends of Mr. and Mrs. C. E. Johnston took them by surprise at their home last Thursday evening. Bridge was played until a late hour, after which all partook of a juicy lunch. Mrs. Johnson was presented with a cup and saucer, accompanied by regret of their departure from the town.

A very serious accident was narrowly averted last week when the timely assistance of Mrs. B. Ingraham saved her son Allen from probable death. Allen had been in the barnyard playing when he was attacked by an unfriendly hog. The boy was badly bitten about the mouth but is recovering rapidly.

It is interesting to note that the trees beautifying the many residences of Arrowwood are fast becoming the natural nesting places of wild birds. This week Fred Miller informs us that two robins have successfully nested in the trees surrounding his house. This is a very encouraging report.

The People Must Pay.

Now, if any, subjects are engaging the attention of the people in Canada, as in most countries, as closely as the subject of taxation. The thing which is of taxes is a matter of deep concern to all. Fortunately, it is receiving serious consideration, not only by those responsible for the administration of public affairs, but by individual citizens.

Taxation in our modern democracies is by no means a simple problem; it is cumulative in effect, and its control is extremely difficult. Every governing and administrative body set up imposes a measure of taxation upon all of us, and, in addition, there are many calls made upon people which, while voluntary in one sense, constitute, in the final analysis, a form of taxation.

First, we have Federal taxation, direct and indirect, levied in a great variety of ways through such agencies as the tariff, excise duties and taxes, sales taxes, income taxes, stamp taxes of various kinds, license fees. Provincial Legislatures follow with a second income tax, land taxes, amusement taxes, license fees to be paid for this, that and the other almost without number. Then the municipalities place another tax on lands, on improvements thereon, some levy a third income tax, some an additional amusement tax, all of them have more license fees to charge. The school boards impose further tax to meet the costs of education.

Hospitals have to be provided for, to some extent this is done through taxation, Provincial and municipal, but often this form of taxation has to be supplemented by voluntary contributions, but which, in reality, are a tax on business and income. Churches have to be maintained even though the law may not compel us to do so, and thus people are in effect again taxed if they are willing to be, and most of them are. Philanthropic and charitable organizations and services of all kinds are maintained in the same way.

The cumulative effect is to place an almost impossible burden, until now we find articles appearing in magazines, financial journals, the daily and weekly newspapers recording the hundreds of millions of debt that have been created, and there are millions that must be annually raised in taxation, while organizations of all kinds are conducting investigations and studies with a view, to arriving at some means whereby the burden can be lessened, and any further increase of it prevented.

Prevention of additional increase is no matter if the people, who are the sufferers, determine there shall be no further increase. Individuals know they must keep within their incomes, or they are headed for trouble and disaster. Private business knows it must accommodate itself to its income, or it will end in bankruptcy. When the public business must realize that what is true in their respective cases is likewise true in public business.

Many people, possibly a majority of them, who are fully aware that they must live within their incomes have nevertheless acted in the belief that it was not necessary for the governing bodies created by them, and supported by them, to follow the same course. Rather, people have insisted that their governments, Federal, Provincial and Municipal, should provide this and that service, and as the people make and unmake governments, the latter have naturally done what their creators demanded they should do. But these same governments have no income except the power to tax people, and this they have proceeded to do.

What people must realize is that if they demand of their governments certain services they must be prepared to pay for those services. They cannot have them otherwise. And if they cannot afford to pay for them, then there is only one thing to be done, and that must be prepared to do, and that is to go without them. That is, in their collective capacity they must govern themselves by exactly the same rules as they are forced to recognize and accept as individuals.—If they cannot pay they must be prepared to do without what they would like to have and would have if they could afford to have it.

It is being predicted that the worst of the depression of the last three or four years is over; that things are once again on the upgrade; that better times are slowly but surely developing; that, in a word, the world is beginning to turn that corner around which it has been said prosperity is lurking. Let us all hope so. But when we have reached and turned that corner, and we are once again tempted to demand something of our governments, we would like to have, and think they ought to supply, it will be part of wisdom to pause and consider whether, after all, we can afford to have it, because, no matter what it may be, it will have to be paid for, and paid for by us—the people,—and paid through the medium of taxes in one form or another.

Many glowing promises are frequently made, and are still being made notwithstanding the bitter experience of the past few years, of what the State can, and ought, and will do for all the peopled, financial principles in administration are adopted. But in these wonderful times are done, the people will pay for them in taxes. And every dollar that people have to pay in taxes is just a dollar less left in their own pockets to spend in meeting their individual taxes and desires. Either they are going to do, and pay for them themselves, or they are going to have the State do these things for them, as the State may determine they should be done, and then pay the State in taxes for the services rendered.

In any event, and under all circumstances, the people will do the paying. They too, can, and can order. They can order beyond their means, and get into trouble. They can order, according to their own needs and desires, and pay what they order. Or they can order the State to do the ordering as the State may see fit to do, and then pay the bills incurred by the State. And the decision, whatever it may be, will be the decision of each and every man acting in his or her capacity as an individual free citizen.

The main point to remember is that there is, notwithstanding the mistaken use of the word, nothing free in this world. Everything has to be paid for, and it is the people who have to foot the bills. Therefore, the day and the manner of settlement should always be kept in mind before the liability, whatever it may be, is incurred.

Colonization Plans

Not Open To Challenge

Calgary Families To Be Settled On Land In The North

Under a plan proposed to Calgary city council by Rev. O. P. Brown, president of the Land Association of Calgary, 30 families on unemployed relief in Calgary would be sent to the land at St. Paul de Metis, north of Edmonton.

The 30 families have made application for the transfer and efforts to bring them under the Dominion Government back-to-the-land scheme are being made, so the colonization scheme can go through.

Sixty per cent of the public school buildings now used in the United States are one-room structures.

United States Fleet Has Perfect Right In Pacific

There is no good reason why Japan should become excited because the United States fleet is being ordered to remain in the Pacific until July, 1934; still less for supposing that the presence of the fleet in these waters is a "velvet threat." Inasmuch as the United States owns Alaska, the Philippines, and Honolulu, and as her continental territory with a Pacific seaboard extends over 18 degrees of latitude, from Juan de Fuca Strait to San Diego, the movement of her fleet in these waters is open to no kind of challenge.—Australasian.

Nearly 8,000,000 spinaries are being reared in textile plants in Japan.

Her Heart Was Weak Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaceburg, Ont., writes:— "I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very glad I did as they have proved of wonderful help to me.

I am now strong and well again, but I can never again get back to the same health.

Write for full details and general advice, just up only by The T. Milburn Co., Ltd., Toronto, Ont.

Scientific World Is Reserving Judgment

As To Whether Living Bacteria In Found in Meteorites

No successful refutation has yet been put forward of the claim of Professor Charles B. Lipman of the University of California, that he has found living bacteria in meteorites, according to Professor F. E. Lloyd, of McGill University, president of the Royal Society of Canada.

What makes it clear that he was not committing himself to support of Professor Lipman's theory, Professor Lloyd, who has been in communication with the California scientist, declares that all who know Professor Lipman recognize in him a careful and exact observer who is not given to rushing into half-baked theories. Professor Lloyd declared that Lipman's account seems to indicate that he has found every precaution he could think of to guard against the accidental transplanting of bacteria into his samples.

The McGill professor also informed The Toronto Star Weekly that an earlier theory of Professor Lipman announcing discovery of live bacteria in coal seams is supported by a German scientist, who, working independently, came to the same conclusion as Professor Lipman.

Like Professor Lloyd the scientific world is still withholding judgment on both cases, although Professor Lipman's announcement as to meteorites is criticized by some who assert that the bacteria must have got into the meteorites after they had reached the earth.

Harnessing Sun Power

May Supersede Water Power As a Source of Energy

Opening ceremonies of the fifth Pacific Science Congress at Vancouver were featured by the radio address of Lord Rutherford, famous Empire scientist, speaking from Cambridge, England.

Harnessing the sun's power may supersede water power as a source of energy in the future if large scale development of a power plant at the Smithsonian Institute, Washington, D.C. proves practical. Dr. C. G. Abbott, secretary of the institute, indicated.

Dr. W. S. Adams, director of the Mount Wilson Observatory, California, outlined his theory that sun spots occur in regular cycles of 12 years. At present, the sun is comparatively opposed to the earth, he said. Dr. Adams discounted any connection between weather on the earth and sun spots.

The Annual crop of icebergs from the Greenland glaciers is about 15,000.

A diamond, when chemically pure, is composed solely of the element carbon.

AFTER WINNING THE AUTO CLASSIC

Portraits Of His Majesty

Five portraits of His Majesty King were presented to Inspector Sandy Wunch, of the Royal Canadian Mounted Police, by Miss M. P. Mackenzie, regent of the Municipal Chapter of Montreal, I.O.D.E. These portraits are intended for five detachments of the Eastern Arctic sub-division of the R.C.M.P.

Daring Burglar Still

Is Puzzling Detectives

"Glimet" Jimmy Reported To Have Made \$100,000 In Chances

Robberies
"Glimet" Jimmy, the most daring—and elusive—burglar in England, whom detectives have been trying to capture for 11 years, carried out two robberies involving £1,000 in cash, early on a recent morning with lightning swiftness.

The problem facing the police in their hunt for Jimmy is that they have no notion of his appearance.

Nor has he ever left behind him a single clue which, in the event of his capture, would definitely establish his identity with his previous crimes.

Only once has a glimpse been caught of him. That was seven years ago when, in carrying out the greatest coup of his career—the raiding of a Deansgate, Manchester, bank—the night watchman saw Jimmy for a fleeting instant as he lay on his back, dazed, making his escape. But Jimmy, who nearly always confines his activities to the north of England, has one invariable method of approach.

For weeks he watches and learns the habits of his intended victim, usually a wealthy shopkeeper.

Then comes the night when Jimmy begins work.

First a visit to his victim's house for the keys of the shop and any valuables in the home safe.

Afterwards, armed with the keys, there is the raid on the shop.

On the latest occasion, Jimmy entered the home of W. Smith, of Ashton-on-Mersey, and, without waking the owner, took a bunch of keys from the bedside and opened a safe in the house, from which he took £300.

Half an hour later Jimmy had taken £1,000 from the safe of Mr. Smith's sister in Gorton.

Jimmy, whose name of "Glimet" comes from his peculiar method of entering a house through a window, is estimated to have secured more than £100,000 by his burglaries.

A Long Session

Last Session Of Parliament Extended Over 232 Days

The session of Parliament just closed extended over 232 days including the adjournment from November 26, 1932, to January 30, 1933.

Only two sessions since Confederation in 1867 have been longer, the longest being the third session of the 11th Parliament which was from November 17, 1910, to July 29, 1911, or 255 days. The next longest was the seventh session of the 12th Parliament, which ran from January 18, to September 20, 1917, or 246 days.

The third session of the fifth Parliament sat from January 29 to March 20, 1870, or 173 days. The shortest session was the fourth of the 12th Parliament which met on August 18, 1914, and prorogued on the 22nd of the same month. These five days, however, were among the most momentous in Canada's history for that brief time the Dominion decided on the policy to be adopted in connection with the Great War.

British Built Aircraft

Have Been Granted An Official Distinguishing Mark

British-built aircraft have been granted an official distinguishing mark—a lion rampant in gold within three rings of red, white and blue. Within the white ring are inscribed the words, "British Certificate of Airworthiness." The mark has been registered under the Trade Marks Act.

The air ministry announcement of the new mark, which will at once distinguish British-built flying machines, no matter what nation's registration marks they bear, states that the mark is authorized to apply to any aircraft, whether lighter or heavier than air. No fee is required for the authorization.

The first aircraft mark authorized was affixed at the London air station, Croydon, to "Astrax," one of the Imperial Airways fleet.

One Kind Of Deal

Angus—You made a big deal. I traded that old horse of mine for a load of hay.

Sandy—But what's the good of the hay if you haven't got a horse to eat it?

Angus—The man's going to lend me the horse long enough to eat up the hay.

The parrots, tortoises, reptiles and birds of prey are found to be the longest lived inmates of the London Zoo.

All the gold mined in the world since Columbus discovered the Americas, would amount to about \$22,413,000,000.

The Boys Are Marching!

Put Ogden's Cut Plug in your pipe and join the parade! Step along with those who've discovered the pleasure that only Ogden's Cut Plug can give to a pipe smoker.

There's only one way to prove that Ogden's Cut Plug is the kind of tobacco you're looking for—put it in your pipe and smoke it!

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

Not Affected By Depression

New Zealand Has Steadily Increased Volume Of Exports

The effects of the depression upon New Zealand have been to some extent modified by the success of efforts to counter-balance falling prices by increasing production. While other countries have been afflicted by rapid contraction of their export trade, in volume as well as in value, New Zealand has steadily increased the volume of her exports. In 1928 exports were 12 per cent greater than in 1926; the official estimates for 1931 show an increase of 20 per cent. Five years, and the volume must have been again substantially greater in 1932, for, in spite of a much lower range of prices, the total value was larger than in 1931.—Auckland News.

"Jones Minor, your father helped you with this essay?"

"Yes, sir."

"Did he write it all?"

"No, sir. I helped him. I corrected his spelling mistakes."

At the present rate of ice recession, the glaciers of Mount Latford National Park probably will disappear in a few thousand years.

"In these bad times you can still travel first-class?"

"I have. I meet my creditors in the third class."

Hang it in your kitchen. Pull out one sheet of Wax-ed Paper at a time.

HER HAND FELT DEAD

Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing"—in the form of Kruschen on Salts—put her right again. . . . "I was sure in a bad state," she writes. "In fact, I was almost bed-ridden. I was so bad with rheumatism in my arms and legs that I could not sleep at night, and had to get up and heat water to wash my face and hands. I took all kinds of medicines. I rubbed it and plastered it but it did not help. . . . I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arm would twitch. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and am so thankful for the Kruschen I have received. Kruschen. Now I sleep all night—thanks to Kruschen's help and relief." (Mrs. J. H.)

The six salts in Kruschen stimulate the liver and kidneys to healthy, regular action; assist them to get rid of the excess uric acid which is the cause of all rheumatic suffering. When poisonous uric acid goes with the deposits of uric acid in the joints—there's no doubt about these aches and pains going!

Copyright by William Byron Mowery

CHAPTER XI—Continued.

Before the spray from the "plane" had fairly settled, Alan was on his feet, stripping off helmet and jacket, looking back at the flag where the bandits lay hidden and the ready bow where Joyce had found a temporary refuge.

From the bandit's covey to the sudden crash of all his plans, he started hopelessly across the water, thousand yards. The launch was stranded, miles away. Pedemall and Bill were both out of the reckoning; the "plane" was disabled; the bandits were free to escape; Joyce and Alan were in their canoes. In the space of five minutes his whole venture had come to nothing.

From the bandit's covey to the sudden crash of all his plans, he started hopelessly across the water, thousand yards. The launch was stranded, miles away. Pedemall and Bill were both out of the reckoning; the "plane" was disabled; the bandits were free to escape; Joyce and Alan were in their canoes. In the space of five minutes his whole venture had come to nothing.

Whirling on Buzzard, he demanded sharply: "You can't taxi back here. Can't get me close enough to use the Browning?"

"Can't taxi a foot. Motor's out. You'll see that when you get here. Can't get me close enough to use the Browning?"

"What long—us to fix that?" "Take us an hour."

Even as Buzzard spoke, Alan saw the bandits rise up under the flags and start showing their canoes into the water! They were going to dart across and recapture Joyce.

At the sight of that, his last hesitation was swept away. Snapping around to the launch, canoe, he jerked out the frail canvas canoe and unfolded it. Buzzard had been thrusting, wrench and tape into his pockets, but now he stopped and stared wide-eyed at his partner.

"Good Lord! You don't intend . . ."

"What else? Stand here and watch them hunt her down?"

"Across that open water? Right into their rifles? Then shooting into you from cover? Alan, don't! For God's sake, don't try that!"

Alan jammed the last thwart-peg into its notch, lifted the canoe one-

handed down upon the water, flung in the paddle and jumped down upon a float.

"Hand me the Browning and the cartridge box. Come alive! Don't let them see you're starting to get Joyce! Why shouldn't I go after them on open water? Larry Young did—and those things down there."

"All right, then," Buzzard gave in. "But if you're going, you've got to be sure you can't be seen. I'll be with you. If they put me out of business, you can help down and get Pedemall and fly over to join Bill. You three can carry it on with your rifles."

He pushed Buzzard's restraining hand, skirted away from the plane and headed west toward that acre of flag where the bandits had been driven to cover.

Piers in hand but his work forgotten, Buzzard climbed upon a wing to reach the ex-captain of that fearfully uneven battle.

Alan's goal was a little patch of reeds three hundred and fifty yards from the bandits. It was a miserable place to fight from, when those four rifles yonder would be snarling at him from perfect hiding. The patch was only a couple of feet high, were as sparse that one could see through the thump; and the approach was to that, open water was a gauntlet of death.

But it was all the cover Alan saw, and he was better at least than nothing. The reeds meant that the water there was shallow enough for him to plant the Browning. By padding up with the canoe bow, he could have it level he might get to the flag. Once there, once the Browning leaped into play, he could smother those rifles in a few seconds.

The bandits had been showing their heavily laden canoes back through the flags to the open water. They were now coming between them and Joyce. But when they saw him skirting away from the plane, they stopped and looked back at him. He knew his intention became unmistakable. Alan saw them hold a quick council. And then, as though realizing how deadly that open water stretch was, how impossible to cross in the face of four rifles, they pulled the canoes back and hid themselves in the flag-covered water.

When he was still two hundred yards from the reed patch and nearly six hundred from the bandits, they opened on him. A rifle boomed duty like a carbou Winchester, and its heavy bullet ricocheted off the water a dozen feet to his left. Another landed at him. A third tucked up a spine a little nearer. Then the fourth, a sharp-cracking Savage, sped down the water street, and the last of a deadly magazine, it sent a bullet so close past Alan's ear that he involuntarily heaved and bent low.

The second bullet splintered a hole through the blade of his paddle, uplited for a stroke. His third, still a hundred yards away, struck the canoe and canoe, ricocheted off, spun endwise and tore through the fat side of the canvas craft, missing the middle thwart by an inch. The fourth, elevated a little, sang past in air, harmlessly, but with a murderous close, whizzing that jerked a gasp from his lips.

The fifth bullet hit Alan.

His left hand felt numb and paralyzed. Glancing down at it, he saw the blood start spurting—falling in crimson splashes upon the white canvas. And then he saw that his ring hand, still cramped and seared, hung by a mere shred of skin.

With one glance he realized his life was beyond any surgery to restore. The dangling hand hampered his grip on the paddle. As though its loss was of no consequence in these moments of life and death, he turned him bold of it. As though the pain came then, in darting throbs that shot to his elbow and made him shiver.

As he gripped the paddle and turned, he saw his eyes ahead again toward the thin patch of reeds, he was hit a second time, by the sixth and last bullet of the "broad's" magazine. For a second he was dazed, no dazed he could not realize where he had been struck. Then he felt a pain like a hot iron pressed along his forehead; and something warm and crimson began trickling down into his eyes, half-blinding him.

The Savage did not shoot again just then. The "broad" was evidently reloading and lowering his elevation slightly. In the comparative silence, he heard the "broad's" magazine being hoarsely about Alan's. Dimly he heard the pleading frantic yell:

"Back away! For God's sake, back away! They'll kill you. Alan! Look across. To your right. Something like cover. . . . Back away, swing over there!"

Sickened by pain and bullet-shock, Alan scooped up a handful of water and dashed it across his eyes, so that he could see. Glancing north, vaguely wondering what cover Buzzard meant, he saw a little red boat two hundred yards distant. As he glanced at it, he saw that it was dry ground, standing a foot above water. A swan nest, there was a huge structure of willow sticks and reeds and tussled heads, almost completely covered it.

Backing off a few dozen yards, he turned the canoe and flung his whole strength into reaching that swan nest.

The three bandits, knowing he was hard hit, seeing the wobbly, erratic course of the canoe, came hurrying out of the flags with eager shots to finish him off.

A bullet, striking a few feet short, ricocheted off the water and tore through the prow. Alan laid the Browning down flat on the bottom to keep the precious weapon afloat, and thrusting his body toward the jagged hole, he tried to stop the spout of water that was rapidly flooding his canoe.

In a hazy way he was conscious that the dreaded Savage was not shooting at him. He was still clear enough of mind to realize there must be some reason, some ominous reason, for that. What was staying that murderous gun?—when he had but a hundred yards to safety? Pausing a second, jerking his head around, he saw the canoe. The "broad" had leaped out of cover, like the others; but had raced up along the flag edge and splashed out into knee-deep water. In deadly range, he intended to end the battle with one magazine of cartridges.

A moment after Alan turned to look, the "broad" crunched, steadied his rifle, and fired. The bullet tore down, the bullet screamed over his neck. It had been aimed at his head. By the fraction of a second he had time to feel the heat of the bullet, he burned through his shirt sleeve, tore a gaping fearful wound through the muscles of his forearm, and crashed in front of his body, three inches from his heart.

Knowing that the next bullet would surely hit him, Alan—flung himself bodily out of the canoe. He was a drowned rat. Submerging himself with the craft between him and the "broad," he clutched the gunwale with his shattered and bleeding hand, using the clumsy craft, he started to swim, in a last gasped effort to reach the safety of the tiny islet. Another flag farther on, in hip-deep water, a spinning slug struck the middle thwart of the canoe squarely and the frail craft caved in. Grabbing body and cartridge webs out of it, Alan flashed a glance at the bandits, rear, and dashed for cover.

Staggered under his heavy burden, with his feet sinking into the quivering muck underfoot, he splashed frantically through the water, throwing his body back and forth, body and his undying strength of heart and will, to those two-score yards. His life haven of safety became dimmer as he groped his way between paddles and reeds. He was struck in the leg; the shock staggered him, he dropped a web of cartridges; he lurched toward the others lying, he lurched on.

Nearly blinded, breathing in lurching gasps, with his great strength ebbing away, he groped and stumbled through those last few yards to the tiny islet, and collapsed there behind the big swan nest.

For a little time, a minute or two, he lay quiet, breathing heavily, fighting down a nausea of pain. Dimly he heard the "broad's" rifle, and he heard the slug-snap of his bullets whirling overhead and plugging into the mud and dry reeds.

(To Be Continued.)

Had Thrilling Adventure

Two Youths Make Bicycle Trip From South Africa To England

A thrilling adventure was completed by two young men, Richard A. Kockler, a German, and Kenneth D. Poulton, a South African. They traveled all the way from Johannesburg to London by bicycle fitted with engines of only one and a quarter horse-power. They travelled 15,000 miles by way of Nairobi, Khartoum, Cairo, Islay Young men, Richard A. Kockler, a German, and Kenneth D. Poulton, a South African. They traveled all the way from Johannesburg to London by bicycle fitted with engines of only one and a quarter horse-power. They travelled 15,000 miles by way of Nairobi, Khartoum, Cairo, Islay Young men, Richard A. Kockler, a German, and Kenneth D. Poulton, a South African. FIRESTONES

Lead Again!

FIRESTONE TIRES set another World's Record by winning the Indianapolis 500 mile International Sweepstake for the fourteenth consecutive year with Louis Meyer driving at an average speed of 104.162 miles per hour, breaking all records. This performance was accomplished without tire trouble and every driver finishing in the money won on Firestone Tires. It was the most grueling test to which Firestone's Tires have ever been subjected. You cannot realize the punishment these tires received. The heat was terrific and the speed faster than ever. The construction features of Firestone's Gun-Dipped Tires, with two extra cord plies under the tread, made it possible for them to endure such severe tests and again proved them to be the strongest and safest of tires.

MILLO NOTES

(Continued from page 1)

her of applications received by the local secretary for Milo school.

Miss Hilda Johnston of Union Jack is visiting her sister, Mrs. Bill Holten.

The marriage is announced of Miss Gladys Soli of Queens-ton to Lawrence Phillips of Milo. The wedding took place on June 16th.

Mr. and Mrs. C. Brinker motored to Calgary last Thursday with their daughter, Ellen for the harmony, history and counterpart Toronto Conservatory exams, which were held Friday and Saturday at Mount Royal College.

Mr. and Mrs. Paltry of Carmanagay spent the week end with Mr. and Mrs. L. Phillips.

Paddy, a much loved ranch hand of Mr. Douglas Hardwick passed away suddenly at the Basano Hospital on Friday evening. A number of his Milo friends motored over for the funeral services which were held on Monday forenoon.

Baseball and softball were played Sunday afternoon at the Lake. Milo winning in both games.

Mr. Lyman Joplin was a visitor at the home of Mr. and Mrs. St. Peter over the week end.

Miss Maude Davidson left for a visit to her sister in B. C.

Health Education in the School

"The Health House," by Miss Helen G. Campbell, Dairy and Cold Storage Branch, Dept. of Agriculture.

Many teachers have found the building of a Good Health House an effective way of stimulating interest in proper food and emphasizing its relation to health. The work can be undertaken by the nurse or teacher in a rural or city school as a classroom project or the House can be used as an attractive exhibit at the school fair or at the closing exercises.

Children find the lesson a fascinating one, particularly if they are encouraged to suggest the materials and support their suggestions by statements regarding the dietary value of each food. Many important facts will be impressed on the minds of the children by their

taking part in the discussion and in the construction of the House. The attached story may assist in the development of the lesson.

Suggestions for the building of the House are given below in response to many enquiries to this office. It is hoped that they will be useful to teachers in the health education programme.

Foods are used to represent the various materials used in house construction. The basis of choice should be the stability of the foods of the child's diet, those which are most important being given prominence and those unsuitable discarded. The building of the House should be the basis of a nutrition lesson and it is well to remember the importance of milk, vegetables, fruits, and the coarser cereals. Various foods may be used to represent these classes, the decoration depending on locality, season, available funds and the size of the House.

The framework on which to paste foods can be built of light weight wood or sheets of beaver-board nailed to a skeleton of wooden supports. Beaver-board is most satisfactory as it is light in weight and can be bought in sheets about three-eighths of an inch thick. Openings at each end of the roof will allow for bottles of milk to represent chimneys.

A satisfactory paste for holding the foods to the framework may be made by using two parts of flour and one part of salt, boiled, with enough water to make a thick paste.

If the House is to be used as an exhibit, one about 21 ins. wide, 18 ins. deep and 24 ins. high (to the peak) is preferable, but if the building is undertaken for a classroom lesson only, a smaller one is just as effective. The stand may be a flat piece of board or a table top covered with woolly cloth as near as possible the shade of grass. Artificial grass, if obtainable, is very satisfactory. The size of the stand used by this Branch is about 4.5 ft. by 3.5 ft.

The cost will depend on the choice of foods. Cheaper foods may be substituted for some of those mentioned in the story.

Watch for next issue for the story of the Health House. (Continued next week)

Now an act, reap a habit; sow a habit, reap a character; sow a character, reap a destiny.

Joint Meeting of U.F.A. and U.F.W.A. at R. F. Williams'

About fifty members and friends of the U. F. A. and U. F. W. A. met at the home of Mr. and Mrs. R. F. Williams on Monday evening. After the usual business meeting of each organization, they reassembled for the social evening. Mrs. Weiss gave a pleasing piano number and Mervin Norton a violin solo. Miss Marion Le Beau of Vulcan, then favored us with two readings in her usual charming manner. A contest, arranged by Mrs. Ward consisting of jumbled letters which when properly arranged proved to be the names of some of the leaders in the progressive group at Ottawa, was enjoyed. As this would be the last meeting Mr. and Mrs. McLeod could be with them, the organization took the opportunity of presenting them with a magazine table as a remembrance of the many years of close comradeship which have been enjoyed. Mr. Norton on behalf of the local wished them all happiness and success in their new home. A luncheon served by the hostesses closed an enjoyable evening.

The Douglas System

During the past three years the whole world, more or less, has been in a chaotic condition and has been valiantly struggling to maintain its equilibrium. We are not able to state that the Douglas System is a panacea for the nation's ills, but William Aberhart, of Calgary, who has made an extensive study of this system, will give a lecture on it in Arrowwood on Thursday, June 29th and we would suggest that all who can, come out and hear what this learned speaker has to say about the much-talked-of Douglas System.

When you are thinking of Plowshares, think of us. We can supply you shares for any and all makes of plows and the price will be no more here than you pay Builliams Sisters or De Louns.

It may be hard but we came by it honestly, to be on the road early and late. We, however, appreciate your business and are always ready to haul anything, anywhere, any time.

It is surprising how quickly the trade becomes interested in a new article when it delivers the goods. This refers especially to Cord Piston Rings. We are informed by Thomas Stevenson, Manager of the Calgary branch and distributor for Southern Alberta, that he is having a busy time to supply the demand.

There are only two things you should not worry about, namely, "the things you can't help" and "the things you can help." Good logic, isn't it? If you "can't" help it will do no good to worry; if you "can"—well, get busy and attend to it.
